

2022

DODGE CHALLENGER

# BROTHERHOOD OF MUSCLE

---

We've always been devoted to distancing ourselves: from the pack, from the competition, from the mundane and – most importantly – from convention. Every Dodge Brand vehicle in our 2022 lineup is designed to deliver something decidedly unique: fierce attitude, formidable horsepower and intense performance.

---

## SRT HELLCAT® // FAMILY OF LEGENDS

Challenger: a name synonymous with muscle. SRT Hellcat: a name known for extreme performance. Together, they create an intense lineup of vehicles – SRT Hellcat and SRT Hellcat Redeye. Each SRT Hellcat variation yields track-ready prowess and jaw-dropping quarter-mile times.

Powered by a Supercharged 6.2L HEMI® SRT® V8 engine, Challenger SRT Hellcat delivers 717 horsepower and 656 lb-ft of torque (535 kw @ 6,000 rpm / 881 Nm @ 4,800 rpm). Two fully functional, air-sucking snorkels on the hood and an illuminated Air-Catcher® headlamp feed cold air to the engine to keep it cool and efficient. SRT Hellcat clocks the 400-meter sprint at 204 km/h.

Challenger SRT Hellcat Redeye houses a high-output version of the Supercharged 6.2L HEMI SRT V8 engine. Combined with 25 major component upgrades, the engine unleashes an unthinkable 797 horsepower and 707 lb-ft of torque (594 kw @ 6,300 rpm / 959 Nm @ 4,500 rpm). Redeye reaches a top speed of 326 km/h and runs a 400-meter sprint at 210 km/h. A fully functional dual-snorkel hood provides maximum air intake to the powerplant. SRT Hellcat Redeye shows up race-ready with standard Torque Reserve, SRT Power Chiller® and After-Run Chiller, all grabbed from the SRT Demon archives. The drive ratio of 2.62:1 is standard and brings increased launch capability.

AEC is excited to continue the Challenger legend by adding new models like the RT and special packages to the range including Hemi Orange, Shaker Package, T.A, 1320, SRT Black Appearance, and more!

All SRT trim levels feature Drive Modes specific to the vehicle. The available SRT tuned Bilstein® Three-Mode Adaptive Damping Suspension System provides driver-selectable settings including: Street (Auto) Mode = sporty but compliant ride; Sport Mode = firm, maximum handling; and Track Mode = firm, maximum handling plus performance shifting and a gear-holding feature to suit any driver's needs. The SRT Drive Modes, accessed via the Uconnect® touchscreen, offer selectable settings for Street (Auto), Sport and Track. A custom setting lets drivers tailor their experience by individually adjusting horsepower, transmission shift speeds, steering effort, paddle shifters, traction and suspension preferences. The standard SRT Performance Pages brings critical vehicle performance data to the driver's fingertips, while race options give the driver the ability to access Launch Control, Shift Light and Line Lock.

## NEW FOR 2022

Legendary DODGE CHALLENGER keeps leading the pack with its well known Pentastar® V6 and HEMI® V8 engines - may they be supercharged or naturally aspirated, classic or widebody. Make your choice to join the Dodge family with this top notch muscle car, an American original taken to European standards by AEC & our outstanding import services.

# CONTROL AND CONQUER

**SPINNING ISN'T WINNING.** Take control of your drive with the impressive available SRT models and their road dominating features: Bilstein® Competition Suspension, SRT Configurable Drive Modes, After-Run Chiller, Lightweight all-aluminum Brembo® six-piston Performance Front Brakes, and 14.2-inch vented rotors, Performance-tuned asymmetrical limited-slip differential with a 2.62 final drive ratio

# BOLDLY GO

**WHAT A LEGEND LOOKS LIKE.** Bold, aggressive and completely unapologetic. The performance hood with dual snorkels, menacing Bi-functional halogen projector with quad halo LED surround, Air-Catcher® headlamps, split LED taillamps and available heritage stripe options tell a story of intimidation and prowess.

////// Challenger SRT Hellcat® shown in F8 Green and Challenger SRT Hellcat shown in Frostbite. Professional drivers. Closed course.

.....  
**CHALLENGER SRT HELLCAT® //**  
with standard illuminated Air-Catcher® Intake

# DUAL SNORKY HOOD

The hood scoop is more than just for show. It is the only way to supply enough air for the supercharged HEMI® power unit. The dual snorky hood optionally comes in satin black or with available dual stripes, giving your Challenger SRT Hellcat® a distinctive and unique exterior appearance.

////// Challenger SRT Hellcat® Widebody shown in Go Mango.

**BADASS BODY LANGUAGE** // Challenger has perfected the art of saying everything without saying a word. Challenger Widebody configurations speak to performance, boldness and power through a more aggressive stance. Available on R/T Scat Pack, SRT Hellcat® and SRT Hellcat Redeye, fender flares are wider and add 8.9 cm to overall vehicle width. The extra room makes room for track-ready 20 by 11-inch forged aluminum wheels riding on sticky 305/35ZR20 Pirelli® P ZERO™ Summer tires on SRT Hellcat and Scat Pack models.

In addition to extra rubber on the road, R/T Scat Pack Widebody includes six-piston Brembo® front brakes and an Adaptive Damping Suspension. All other widebody models employ a standard widebody competition suspension that lets you take curves and corners with confidence.

////// Challenger SRT Hellcat Widebody models shown in Indigo Blue, F8 Green and Go Mango with available dual stripes.

////// SRT Hellcat® shown in F8 Green with available dual stripes. Professional driver. Closed course.

IF WE WERE  
FOR EVERYONE,  
**WE'D BE FOR NO ONE**

////// Challenger SRT Hellcat® shown in Indigo Blue with available dual stripes in Carbon. Professional driver. Closed course.

**TRACK-PROVEN TUNED CHASSIS** // Intense track conditions require tightly engineered hardware. Challenger showcases a high-performance-tuned chassis that's ready to go.

**SHOCK ABSORBERS** // Available Bilstein® high-performance shock absorbers are precision-damped to help provide a confident, smooth ride for the typical commute while still being capable for weekend track duty.

**SUSPENSION** // Every Challenger in the lineup is underpinned by a proven suspension. Depending on trim level, options range from sport-tuned to competition to drag-race-specific suspension.

Movement and staying power come from a sophisticated suspension geometry and rear-wheel drive (RWD). The independent five-line rear suspension is finely tuned to help provide remarkable handling and ride comfort. A lower unsprung mass helps maintain optimum tire contact with the ground and minimize road noise.

Models equipped with a 392 HEMI® V8 engine feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Exclusive Bilstein shocks and a lowered suspension allow these performers to achieve 0.93 g on the skid pad.

A Bilstein Three-Mode Adaptive Damping Suspension System is AEC standard on R/T Scat Pack and factory standard on all SRT Hellcat® models. It offers different suspension firmness settings: Street Mode (sporty), Sport Mode (firm) and Track Mode (firmest max handling). The standard R/T Scat Pack suspension delivers performance handling through an aggressive front- and rear-camber geometry. Set at -1.2 degrees in the front and -0.75 degrees in the rear, Challenger is set up for high-speed cornering, with its tires leaning inboard at the top relative to the body.

////// Challenger R/T shown in White Knuckle.

# POWER THAT'S ALWAYS UNBRIDLED ... BUT NEVER UNHINGED

**SUPERB STOPPING POWER** // Standard 4-wheel antilock disc brakes provide solid stopping power on SXT. Additional stopping power comes from the available Brembo® Performance Brake System, featuring vented two-piece front rotors and four-piston front calipers for outstanding heat management and that provide superior braking performance on the RT. For superb stopping capabilities, the SRT® engineered Brembo Performance Brake System, with six-piston front and four-piston rear calipers, results in improved performance braking when paired with wind-tunnel-designed brake ducts on the RT Scat Pack and SRT models.

Professional driver. Closed course.

**CHALLENGER SEATS //**  
shown in Black Nappa leather trim and Alcantara® suede with embossed Hellcat logo

////// **SXT**

Experience and technology is what separates the leaders from the followers. It makes muscle cars even stronger and your ride even more epic. Get started with the 2022 version of a true 1970s icon featuring the legendary V6 Pentastar® 3.6L engine with over 300 HP.

////// Challenger SXT shown in Triple Nickel.

**POWER WHERE AND WHEN YOU NEED IT** // Challenger SXT All-Wheel Drive (AWD) delivers big control exactly when you need it. The advanced automatic front-axle disconnect technologically, intuitively and seamlessly transitions between rear-wheel drive (RWD) and AWD without driver intervention. Under normal driving conditions, the front axle is disengaged and 100 percent of the engine's torque is directed to the rear wheel. When sensors indicate more traction is needed, the system automatically engages the front axle and instantly transitions to AWD Mode. These systems work with the vehicle's Electronic Stability Control (ESC)<sup>1</sup> System to deliver precise front-to-rear torque control while preserving unrelenting drive.

**THE DODGE R/T IS BRAND NEW TO THE AEC LINEUP!** // Where style and efficiency meets performance, the 5.7L HEMI® V8 engine delivers up to 375 horsepower and includes fuel saver MDS technology to switch from eight cylinders to four when you want to save on fuel consumption. The AEC Standard package will let you make the asphalt your playground with High Performance Suspension, Anti-Spin Differential, Brembo 4-Piston Fixed Brakes, and Summer tires sitting on 20-inch Painted Aluminum wheels. Tough and timeless, the R/T design was finely crafted to show off the classic exterior slimbody shape, including the SRT Front Splitter, while enjoying the comfort of the AEC standard Nappa/Alcantara Performance seats. Take control while driving with the heated, flat-bottom steering wheel with paddle shifters.

////// Challenger R/T shown in Indigo Blue

#### ///// R/T SCAT PACK

Behind the retro-inspired Bumble Bee badge is a nameplate and trim level steeped in muscle-car heritage. Challenger R/T Scat Pack gets its prowess from the legendary 392 HEMI® V8 engine. The numbers tell the rest of the story: 485 horsepower, 475 lb-ft of torque, 0 - 100 km/h in the low-4-second range and a 400-meter sprint in the mid-12-second range. This pavement-pounding power is backed by four-piston Brembo® brakes, Three-Mode Electronic Stability Control (ESC)<sup>1</sup> with Full-Off Mode, high-performance suspension with Bilstein® shocks and 20 by 9-inch aluminum wheels. Every R/T Scat Pack model includes

Dodge SRT® Performance Pages that features everything from Launch Control to a g-force meter to drag-race timers. This real-time data can also be accessed on either the standard 7-inch reconfigurable digital display housed between the gauges or the standard 8.4-inch Uconnect® touchscreen. SRT Drive Modes offer the ability to customize steering feel, transmission shift points, throttle response, ESC<sup>1</sup> tuning and suspension firmness (if equipped with Adaptive Damping Suspension). Race-inspired seats feature a Scat Pack Bee logo embroidered on AEC Standard Nappa leather trim with Alcantara® suede inserts.

\*About this brochure: all disclosures can be found on the last page. Professional driver. Closed course.

# 1320

Subtle isn't what this car is about. It was conceived to live its best life on the drag strip. Its purpose is maximum acceleration. It's outfitted with everything needed to floor it on the last yellow: TransBrake, drag suspension, Adaptive Damping Suspension, 275/40R20 102Y Drag Radial tires and 20 by 9.5-inch Low-Gloss Black drag wheels with knurled bead seats. This is the 1320, and it's only available on R/T Scat Pack. The unique fender badge lets everyone know you aren't messing around; the badge on the

instrument panel reminds you that you're well-equipped for the run. Settle in, select Drag Mode to adjust the traction and stability control settings, grip the Alcantara® wrapped performance steering wheel, wait for double yellow lights, then engage the TransBrake, release when the Christmas tree goes green and move down the 400-meter sprint with the full force of the 6.4L HEMI® engine and its 485 horses and 475 lb-ft of torque.

////// Challenger R/T Scat Pack shown in Pitch Black with available 1320.

# SHAKE IT UP

The available Shaker Package supplies a bigger performance kick through a Mopar® Cold-Air Intake and full-floating, open-element Shaker hood scoop.

////// Challenger R/T Scat Pack shown in Hellraisin with Shaker Package.

**R/T SCAT PACK WIDEBODY** // Beefed-up stance, bold performance and booming exhaust notes are just some of the R/T Scat Pack Widebody features that will get you noticed. Level up to the 3.09 Rear Axle Ratio, Widebody Competition Suspension, and Brembo Six-Piston Fixed Front Caliper Brakes. Interior designs include a Flat-Bottom Leather-Wrapped Steering Wheel and Performance Shift Indicator.

For a custom feel, opt for the newly available T/A Package that includes a Black grille and bezel with dark R/T grille badge, T/A bodyside graphic and spoiler decal, 392 fender decal, Black Satin-painted hood, satin wrap roof and decklid, Black fuel-filler door, and 20 by 11-inch Carbon Black aluminum wheels. This package also features a Mopar Cold-Air Intake, illuminated Air-Catcher® headlamps and functional hood scoop. Inside, there's a retro vibe from the AEC Standard Nappa/Alcantara Performance seats and White-face IP cluster with Gloss Black trim rings.

**A BOLDER SLICE OF STYLE** // Outfit your Challenger in the new HEMI® Orange Package. Available exclusively on Challenger R/T Scat Pack Widebody, this package brings race-inspired style to your vehicle. A sporty, offset Orange and Gunmetal stripe runs tip to tail for maximum impact. Orange brake calipers are visible through the spokes of the 20 by 11-inch Carbon Black Warp-Speed aluminum wheels. The trim level badging with pops of Orange does the rest of the talking.

Inside, Desert Orange accent stitching gives a custom feel to the instrument panel (IP), steering wheel, shifter boot, seats and doors. K-Black and Gloss Black accents are found on the three steering wheel bezels, the cluster mask trim, HVAC rings and the shifter body. An Orange-accented "392" instrument panel (IP) badge also sets this package apart.

////// Challenger GT shown in Granite with HEMI Orange Appearance Package.  
The GT model is not available for sale at this time, photo is for Hemi Orange display purposes only.

**///// SRT® HELLCAT WIDEBODY**

Its style may start conversations, but the Supercharged 6.2L HEMI® V8 engine under its hood has the power to silence them. While its performance tuned engine provides mind-blowing acceleration, the 8.9 cm wider track help all that speed join you through the corners and provide impressive stability and grip.

///// Challenger SRT Hellcat Widebody shown in Indigo Blue

**///// SRT HELLCAT® REDEYE WIDEBODY IS REBELLIOUSLY POWERFUL**

Subtle isn't in our vocabulary, because disturbing the peace is all part of the fun. And that's how we got here, to the Dodge Challenger SRT® Hellcat Redeye Widebody. It's bigger, wilder, and a ton more fun. If you're always ready to soar past the competition at a moment's notice, you ought to get behind the wheel of one.

The Redeye ups the ante with an impressive 797 horsepower. All you need are the keys and some fuel, and the Supercharged 6.2L High-Output HEMI® V8 engine can rip 11.1-second 400-meter sprint times—straight from the showroom floor.

///// Challenger SRT Hellcat Redeye Widebody shown in TorRed

**THE SRT® BLACK PACKAGE | THE DARKER SIDE OF MUSCLE**

Give your Challenger SRT® a sinister look with the AEC Standard SRT Black Package. With blacked-out exterior SRT badges on the grille, fenders and rear decklid spoiler, this package helps ensure the loudest part of your muscle car is the Supercharged HEMI® V8 engine.

////// Challenger SRT Hellcat Redeye Widebody shown in Pitch Black

# SAFETY & SECURITY FEATURES

**PARKVIEW® REAR BACK-UP CAMERA<sup>2</sup>** // This system displays the area directly behind your vehicle when the vehicle is in Reverse. Dynamic grid lines adjust with steering input to assist in parking. Standard.

**PARKSENSE® REAR PARK ASSIST<sup>3</sup>** // When your vehicle is in Reverse and moving at a low speed, the system can detect objects in your vehicle's path. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. AEC Standard.

**BLIND SPOT MONITORING (BSM)<sup>4</sup> AND REAR CROSS-PATH DETECTION<sup>2</sup> SYSTEM** // Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminated icons in the sideview mirrors and by an audible chime. The system includes Rear Cross-Path Detection<sup>2</sup>, which monitors for vehicles and objects in perpendicular relationships to the vehicle while backing out of, for example, parking spots or driveways. AEC Standard.

**ADAPTIVE CRUISE CONTROL (ACC)<sup>5</sup>** // Automatically adjusts vehicle speed to maintain desired distance from the vehicle ahead. Available with Technology Group.

**FULL-SPEED FORWARD COLLISION WARNING (FCW)<sup>6</sup>** // Radar and camera technology combine to alert you when the system senses potential frontal impact. If you're not able to respond quickly enough, the system will transmit audible and visual warnings. Warning sensitivity can be adjusted to driver preference. Available with Technology Group.

**ELECTRONIC STABILITY CONTROL (ESC)<sup>1</sup>** // This system is designed to assist the driver in maintaining control of the vehicle when a loss of traction is detected. ESC<sup>1</sup> senses when a vehicle loses steering control and attempts to correct the vehicle's course by automatically applying the brakes at individual wheels. Standard.

**RAIN-SENSING WINDSHIELD WIPERS** // System sensors automatically detect moisture on the windshield and activate the wipers. Available with Technology Group.

**READY ALERT BRAKING** // The system anticipates situations when you might initiate an emergency brake stop and uses the ESC<sup>1</sup> pump to precharge the brake system in order to decrease the time required for full brake application. Standard.

**RAIN BRAKE SUPPORT** // When your car's windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard.

## IN TOUCH WHEREVER YOU GO

The Uconnect® system is your customizable, connected vehicle platform dedicated to safe and seamless communication, navigation and entertainment – all from one easy-to-use touchscreen.

Uconnect®

## COMPATIBILITY YOUR WAY

Uconnect® brings a wide range of interactive features to your vehicle and beyond through a highly intuitive communication experience.

### UCONNECT PHONE<sup>7</sup>

Stay connected safely. Pairs a Bluetooth® phone to send and receive hands-free<sup>7</sup> calls. Includes:

- **DO NOT DISTURB** to route incoming calls to voice mail and suppress text messages.<sup>8</sup>
- **VOICE RECOGNITION** to make hands-free<sup>7</sup> calls, listen and respond to text messages,<sup>8</sup> record voice memos, and select media stations and navigation destinations.

### DRAG-AND-DROP MENU BAR

We've made it easy to customize your Uconnect dashboard with your favorite features and services. Simply press the Uconnect icon on the main menu bar to view all of the available apps. Tap and hold any one of the icons to drag and drop into a personalized menu bar.

### SIRI® EYES FREE<sup>9</sup>

Just say it. Use voice commands with Siri Eyes Free<sup>9</sup> and your connected iPhone® to create and send texts,<sup>8</sup> make and receive calls, access directions, and play music. Available.

### ONE-STEP NAVIGATION

Take the best route right now. Uconnect employs EU GPS Navigation for audible turn-by-turn directions, and detailed 3D maps help to ensure you arrive on time. Use Voice Command and say the complete address to get directions quickly. Available.

Display your favorite iPhone® apps right on your Uconnect® touchscreen. Access your iTunes® library, call anyone in your contacts list or just ask Siri® to help you out while you drive. Get directions, make calls and send messages, and connect to Apple Music, all without pausing your drive. Standard.

Bring the best of Google with you in your Uconnect system. Talk to Google on Android Auto™ and get things done with your voice so you can keep your focus on driving. Easily send messages, get directions, control media and more. Just say, “Hey Google” or long-press the voice control button on your steering wheel. Standard.

# AEC SERVICES

## ///// IMPORT

As an official importer for Dodge, we at AEC are the best source for your Dodge vehicle needs. Our vehicles are ordered directly from the manufacturer, configured to your specifications, and delivered directly to the European Union. We guarantee that our vehicles meet all country-specific specifications according to European law. When you are looking for a Dodge vehicle, AEC and the AEC dealer network is the place to go.

## ///// HOMOLOGATION

AEC vehicles are prepared to manufacturer quality to meet all standards of the E.U. We can assist our customers with the technical conversion, documentation and certification of their vehicles throughout the entire European Union. Customers can rest assured that our extensive experience and that of our AEC dealers ensure that your vehicle meets the registration requirements of your country.

## ///// FINANCING

As a European customer, you can rely on an extensive range of financial services via your AEC dealer. Our cooperation partner Santander Consumer Bank provides all financial services you will need. The Santander Consumer Bank is one of the biggest industry service providers for financial services. It has many years of experience in the automotive sector, as well as an excellent reputation.

## ///// WARRANTY

AEC offers extensive, industry leading warranty coverage for all Dodge vehicles. AEC Premium is an insurance product based on the conditions in the factory warranty that provides full coverage for defects in all mechanical and electronic vehicle components for 24, 36, 48 or 60 months or up to 200.000km mileage. With the AEC Premium Plus Extended Warranty, you have the possibility to extend your AEC Premium Plus Warranty with a further 12, 24 or 36 Months (maximum total validity of 60 Months).

# AEC PREMIUM PLUS WARRANTY

## TERMS AND CONDITIONS

### § 1 Subject matter

1. The seller/guarantor Auto Export Corporation (hereinafter referred to as "AEC"), 24 Commerce Place, St. Catharines, Ontario, Canada, L2S 0B3) gives the buyer/guarantee holder (dealer), under the other conditions set forth in § 4, a guarantee of the functionality of the assemblies specified in § 2 (1) for the term set in the guarantee agreement. The dealer assigns their rights under these guarantee conditions to the vehicle buyer named in the guarantee agreement. The vehicle buyer accepts this assignment. Compensation will be provided according to the guarantee if one of the guaranteed parts loses its functionality within the agreed guarantee term, and not as a result of a fault in non-guaranteed parts, so that a repair becomes necessary. The guarantee applies within the country, to temporary trips such as holiday and business trips, and also throughout Europe. A temporary trip does not include when the vehicle is predominantly abroad for a period of more than six weeks. The guarantee does not justify any claims for revoking the purchase contract or reduction (reduction of the purchase price). If the repair is unsuccessful twice, the buyer/guarantee holder may request that another specialist garage be commissioned to carry out the repair. This guarantee does not exclude any eventual claims of the buyer under the statutory guarantee. Another condition for guarantee claims is compliance with the requirements of § 4.
2. CAR-GARANTIE GMBH (hereinafter referred to as "CG"), Gündlinger Strasse 12, D-79111 Freiburg, is authorized by the seller/guarantor (AEC) to process the entire guarantee with the buyer/guarantee holder on its behalf and for its account. Notices of amendments (such as a change of holder) and claims subject to guarantee shall be reported to CG.

### § 2 Scope of the guarantee

1. The guarantee covers all factory-installed mechanical, electrical, electronic, hydraulic and pneumatic parts of the vehicle described in the guarantee agreement, unless they are excluded by the following paragraphs 2 and 3.
2. Material and labor costs will not be compensated for:
  - Additional equipment not available from the factory
  - Refilling and refilling as well as retrofitting of air conditioning systems
  - impurities in the fuel system
  - elimination of noise
  - Attachments, superstructures and conversions (covered, however, if installed by AEC)
  - Corrosion, oxidation and paint damage;
  - Clutch and brake linings (however the multi-disc clutch is covered in automatic and Transfer cases), brake disks and drums, shock absorbers, light bulbs, spark plugs
  - Button cells and starter batteries
  - Wiper Blades and all drive belts (but the toothed / timing belts of the Engine control)
  - Parts that are regularly replaced during maintenance / servicing work

- Tires and wheel balancing
- Spark plugs, hoses and required, specified small items will be reimbursed, provided that they have to be replaced in connection with the repair of compensable damage.

### § 3 Exclusions

No guarantee applies without consideration of contributing causes of damage:

- a. by accident, such as an event directly resulting from a sudden external mechanical force;
- b. through improper, mischievous or malicious actions, misappropriation, in particular theft, unauthorized use, robbery and embezzlement, damage that is directly caused by animals, storm, hail, frost, corrosion, lightning strike, earthquake or water ingress, as well as by scorching, fire or explosion;
- c. by war events of any kind, civil war, civil unrest, strike, lockout, terrorism, vandalism, seizure or other sovereign interventions, or by nuclear energy
- d. arising from participation in driving events with racing character or from associated practice rides;
- e. by altering the original design of the motor vehicle (such as tuning, VMAX suspension, gas conversion, etc.) or by installing third-party or accessory parts that are not approved by the manufacturer;
- f. by the use of a part that is recognizably in need of repair, unless the damage can be shown to be unrelated to the need for repair, or when at the time of the damage the part had been at least provisionally repaired by a trained professional;
- g. when the buyer/guarantee holder has at least temporarily used the motor vehicle for commercial passenger transport or if the motor vehicle has been leased commercially to a changing group of persons;
- h. caused by the use of unsuitable operating materials or by a lack of operational materials (lubricants, oils, cooling water, etc.); for which a third party is required to intervene, which is rectified as an expression of the manufacturer's goodwill, or which are caused by a manufacturing or material defect that occurs in large numbers of the vehicle type (serial defect) and for which in principle manufacturer's scope comes into consideration according to type and frequency.

### § 4 Condition for guarantee claims

The condition for any guarantee claims is that the buyer/guarantee holder,

#### 1. before the claim event:

- a) has carried out and documented the maintenance, inspection and care on the vehicle that is prescribed or recommended by the manufacturer at the dealer or at an authorised workshop recognised by the manufacturer, or carried out and documented in accordance with the manufacturer's specifications. Exceeding the manufacturer's kilometre specification of up to 3,000 km or the manufacturer's timeframe of up to three months is

harmless, whereas the exceeding of one of the specified specifications already precludes a guarantee claim. A guarantee claim is only contrary to one of the aforementioned requirements if it is responsible for the occurrence of the damage. Concurrent causality is sufficient. Concurrent causality is suspected. The buyer/guarantee holder is at liberty to prove the lack of causation.

- b) fails to indicate interventions or other influences on the odometer, immediately indicates a defect or the need for immediate replacement of the odometer indicating the mileage.
- c) follows the vehicle operating instructions of the manufacturer

#### 2. after the claim event:

- a. immediately notifies the seller/guarantor (AEC) or the CG at their relevant registered offices the relevant damage under guarantee after the occurrence of the same but before the repair, by phone or by email;
- b. has the repair done by the dealer. After consultation with CG, the repair can also be carried out at another qualified vehicle garage;
- c. demonstrates CG any maintenance or care performed since the beginning of the guarantee with invoices from the dealer or the executing workshop by submitting copies of the documents;
- d. allows an authorized agent of the seller/guarantor (AEC) and/or of CG to carry out an inspection of the damaged parts at any time and, upon request, provides the information necessary to establish the damage;
- e. reduces the damage as much as possible while following the instructions of CG; if circumstances permit, he shall obtain such instructions before the repair begins.

### § 5 Reimbursement of costs

**1. Guarantee-related labor costs will be fully reimbursed to the buyer/guarantee holder according to the manufacturer's standard working hours. Guarantee-related material costs are paid at most according to the non-binding price recommendations of the manufacturer.**

**2. If the repair costs exceed the value of an exchange unit that is customarily installed in the case of such damage, the obligation to pay compensation shall be limited to the cost of this replacement unit, including removal and installation costs, applying paragraph 1.**

3. The maximum amount of compensation subject to guarantee is limited to the time value of the damaged vehicle at the time the guarantee claim occurs per claim.

#### 4. No compensation is paid for:

- a. the costs for testing, measuring and adjustments (according to the manufacturer's working time standard), insofar as they are not incurred in connection with damage requiring compensation and maintenance, inspection, cleaning or care work prescribed or recommended by the manufacturer;
- b. the replacement of direct or indirect consequential damages, such as shipping and disposal costs, parking fees and compensation for lost use; paragraph 5 shall remain unaffected hereby.

### 5. Expenditures for mobility

If agreed separately in the guarantee agreement, the expenditures for achieving mobility (i.e. towing, rail travel, rental car, accommodation and telephone costs) will be reimbursed.

### § 6 Claims settlement

1. CG assumes responsibility on behalf of the seller/guarantor (AEC) for processing all claims with the buyer/guarantee holder. A repair invoice must be submitted to CG containing a clear and detailed description of the work performed, the spare parts prices and the labor costs with standard working hours.

2. In every case, the guarantee shall be notified to CG by phone prior to the repair so that CG can authorize the repair. A telephone service is available for this:

Monday to Friday from 8:00 am to 5:00 pm at +49 761 4548-966, warranty-en@aeeurope.com

### § 7 Assignment of claims and statute of limitations

1. In the event the vehicle with the guarantee is sold, the guarantee claims pass to the new holder with the ownership of the vehicle. Any change in ownership must be reported to AEC or CG in writing no later than 14 days after the change in the holder.
2. Claims under the guarantee lapse six months after the claim event, at the latest six months after the end of the guarantee term.
