

2022

DODGE CHARGER

BROTHERHOOD OF MUSCLE

We've always been devoted to distancing ourselves: from the pack, from the competition, from the mundane and – most importantly – from convention. Every Dodge Brand vehicle in our 2022 lineup is designed to deliver something decidedly unique: fierce attitude, formidable horsepower and intense performance.

FAMILY OF LEGENDS

Essentially, this daily driver is a beast.

SRT HELLCAT® REDEYE //

Being the world's most powerful and fastest mass-produced sedan* wasn't enough. Charger SRT Hellcat Redeye now has the same Supercharged 6.2L high-output HEMI® V8 engine that possessed the limited-production 2018 Dodge Challenger SRT® Demon. SRT Hellcat Redeye uses 797 horses, 707 lb-ft of torque (594 kw at 6.300 rpm / 959 Nm at 4.500 rpm) and a TorqueFlite® 8HP90 8-speed automatic transmission to run a 400 meter sprint in 10.6 seconds at 207 km/h, go from 0-100 km/h in the mid-3s and hit a top speed of 326 km/h. The engine wasn't the only equipment borrowed from the Demon archives. Charger SRT Hellcat Redeye also grabbed Torque Reserve, which delivers up to 3.9 psi of boost at launch and up to 55 percent more engine torque. Both the steel prop shafts and the half-shafts allow the vehicle to handle the additional torque created with the help of the SRT Power Chiller® and After-Run Chiller.

Essentially, this daily driver is a beast.

SRT HELLCAT //

Only slightly less raucous than its sibling, Charger SRT Hellcat throws down serious performance numbers of its own. Its 717-horsepower, 650-lb-ft-of-torque performance (535 kw at 6.000 rpm / 881 Nm at 4.800 rpm) is also supplied by a Supercharged 6.2L HEMI SRT Hellcat V8 engine. Its dominance shows in 0-100 km/h runs in 3.8 seconds and its impressive 10.96 400 meter sprint elapsed time – even on street tires.

SRT DRIVE MODES //

All SRT Hellcat trim levels feature Drive Modes specific to the vehicle. The SRT tuned Bilstein® Three-Mode Adaptive Damping Suspension System provides driver-selectable settings including: Street (Auto) Mode = sporty but compliant ride; Sport Mode = firm, maximum handling; and Track Mode = firm, maximum handling plus performance shifting and a gear-holding feature to suit any driver's needs. The SRT Drive Modes, accessed via the Uconnect® touchscreen, offer selectable settings for Street (Auto), Sport and Track. A custom setting lets drivers tailor their experience by individually adjusting horsepower, transmission shift speeds, steering effort, paddle shifters, traction and suspension preferences. The standard SRT Performance Pages brings critical vehicle performance data to the driver's fingertips, while race options give the driver the ability to access Launch Control, Shift Light and Line Lock.

////// THE SOUL OF A REBEL Charger SRT Hellcat® Redeye Widebody shown in White Knuckle with Satin Black-Painted Graphics Package.

////// Charger Scat Pack Widebody shown in Go Mango with available Satin Black-Painted Graphics Package and Charger SRT Hellcat® Widebody shown in Frostbite with available Satin Black-painted hood and sunroof.

//// Charger SRT Hellcat® Redeye and SRT Hellcat Widebodies have looks as aggressive as their performance. The iconic-inspired design showcases scalloped bodysides, an imposing grille and an all-out aggressive look. A newly designed performance hood provides maximum air intake to the supercharged powerplant from the functional hood scoop to boost power. The mail-slot grille lets cool air travel into the radiator and maintain ideal operating temperatures even in the hottest conditions. Side sills connect the front and rear fascias to help amplify the integrated design. In the rear, a standard one-piece, body-color performance spoiler details the back design while adding downforce to help bring high-speed balance to the vehicle.

The standard Widebody flares out an additional 3.5 inches from the overall width of the Charger for a more dominating, planted presence. Charger SRT Hellcat Widebody rides on Split 5-spoke Low Gloss Black Wheels and wider, stickier AEC Standard Pirelli® 305/35ZR20 Three-Season tires. This combination teams with a new competition suspension tuning with Bilstein® three-mode adaptive damping to produce even more grip, delivering next-level performance on the street, strip and road course. SRT Hellcat Widebody runs 2.1 seconds faster on a 3.3 km road course, equal to 13 car lengths after one lap.

EXTRA WIDE,
EXTRA PERFORMANCE

////// Charger SRT Hellcat Widebody shown in Pitch Black. Professional driver. Closed course.

DODGE HAS ALWAYS BEEN, AND ALWAYS WILL BE,

A BRAND FOR THOSE WHO CRAVE **POWER**, DEMAND TECHNOLOGY
AND **WANT TO STAND OUT.**

White Knuckle with available dual stripes in Carbon.

PERFORMANCE ON THE PROWL

////// Charger Scat Pack Widebody shown in F8 Green.

TRACK-PROVEN-TUNED CHASSIS // Intense track conditions require tightly engineered hardware. Charger showcases a high-performance-tuned chassis that's ready to go.

SHOCK ABSORBERS // Available Bilstein® high-performance shock absorbers are precision-damped to help provide a confident, smooth ride for the typical commute while still being capable for weekend track duty.

SUSPENSION // Every Charger in the lineup is underpinned by a proven suspension. Depending on trim level, options range from sport-tuned to high-performance to drag-race-specific suspension. Movement and staying power come from a sophisticated suspension geometry and Rear-Wheel Drive (RWD). The independent five-link rear suspension is finely tuned to help provide remarkable handling and ride comfort. A lower unsprung mass helps maintain optimum tire contact with the ground and minimize road noise.

Models equipped with a 392 HEMI® V8 engine feature unique suspension geometry that helps improve balance, cornering ability and steering responsiveness. Exclusive Bilstein shocks and a lowered suspension allow these performers to achieve 0.93 g on the skid pad.

A Bilstein Three-Mode Adaptive Damping Suspension System is AEC Standard on Scat Pack and SRT Hellcat® models. It offers different suspension firmness settings: Street Mode (sporty), Sport Mode (firm) and Track Mode (firmest max handling). The standard Scat Pack suspension delivers performance handling through an aggressive front- and rear-camber geometry. At -1.2 degrees in the front and -0.75 degrees in the rear, Charger is set up for high-speed cornering, with its tires leaning inboard at the top relative to the body.

AGGRESSIVE FRONT- AND REAR-CAMBER GEOMETRY // Performance handling requires maximum road-holding grip, and Charger Scat Pack models deliver with aggressive front- and rear-camber geometry.

////// Charger Scat Pack shown in TorRed with available Daytona Edition and Charger Scat Pack Widebody shown in Frostbite with available Satin Black-painted hood.

////// Charger SRT Hellcat® Redeye Widebody shown in White Knuckle.

////// Charger Scat Pack Widebody shown in Hellraisin with available Satin Black-Painted Graphics Package.

////// Challenger SRT Hellcat® Redeye interior shown.

The interior is a striking balance of throwback style and must-have technology. A one-piece extruded aluminum instrument-panel bezel houses the 7-inch reconfigurable digital gauge cluster. Buttons on the steering wheel let you scroll through hundreds of different vehicle configurations and customize what information you see and how you see it.

////// Charger R/T Scat Pack interior in Black.

////// Charger SRT® shown with AEC Standard premium Laguna leather trim with perforated inserts.

NOT SUBTLE,
NOT SORRY

////// Charger SRT Hellcat® Widebody shown in Frostbite and Charger Scat Pack Widebody shown in White Knuckle.

A BOLDER SLICE OF STYLE // Opt to outfit your Charger with the all-new HEMI® Orange Package. Available exclusively on Charger Scat Pack Widebody, this package brings race-inspired style to your vehicle.

A sporty, offset Orange and Gunmetal stripe runs tip to tail for maximum impact. Orange brake calipers are visible through the spokes of the 20 by 11-inch Carbon Black Warp-Speed aluminum wheels on Scat Pack. The trim-level badging with pops of Orange does the rest of the talking.

Inside, Desert Orange accent stitching gives a custom feel to the instrument panel (IP), steering wheel, shifter boot, seats and doors. K-Black and Gloss Black accents are found on the three steering wheel bezels, the cluster trim, HVAC rings and the shifter body. An Orange-accented "392" instrument panel (IP) badge also sets this package apart.

////// Charger Scat Pack Widebody with HEMI Orange Package shown in Granite.

PERFORMANCE:PRIDE

SCAT PACK /////

The feeling is nostalgia. The performance is modern-day technology. The bragging rights are yours. Charger Scat Pack and Scat Pack Widebody are fed by the 362 KW, 644 NM at 4100 RPM 392 HEMI® V8 engine. Scat Pack models feature big Brembo® brakes, Three-Mode Electronic Stability Control (ESC)² with Full-Off Mode, high-performance suspension with Bilstein® shocks and 20 by 9-inch aluminum wheels, and available cold-air induction to help you use that power responsibly.

Scat Pack Widebody features its own upgraded, specially tuned suspension with Three-Mode (Auto, Sport and Track) Bilstein adaptive damping and 20 by 11-inch wheels. The result is unthinkable levels of lateral grip, acceleration and braking, delivering premium handling. Massive 15.4-inch Brembo two-piece brake rotors with 6-piston front calipers deliver tremendous stopping power, heat management and longevity.

The numbers Scat Pack Widebody yields tell an impressive story: 0-199 km/h in 4.5 seconds, 400 meter sprint in 12.4 seconds ET and 0.98 g lateral grip on the skid pad.

Charger Scat Pack interior boasts standard race-inspired seats complete with embroidered Scat Pack Bee logo (Nappa leather trim with Alcantara® suede inserts). Every Scat Pack model includes Dodge SRT® Performance Pages that features everything from Launch Control to a g-force meter to drag-race timers. This real-time data can also be accessed on either the standard 7-inch reconfigurable digital display housed between the gauges or the standard 8.4-inch Uconnect® touchscreen. SRT Drive Modes offer the ability to customize steering feel, transmission shift points, throttle response, ESC tuning and suspension firmness included with AEC Standard configurations.

///// Charger Scat Pack Widebody shown in Indigo Blue.

DAYTONA EDITION // // //

An ode to our forefathers, the available Daytona Edition Group brings modern strength to a beloved classic

The Daytona Edition is available on the R/T Scat Pack Slimbody model, imported by AEC.

The sleek exterior is defined by the 20x9-Inch Forged/Painted Aluminum Wheels with All Season Tires and multiple “Daytona” and “392” decals and badges from the grille to the trunk. Get inside to discover premium upgrades like the Black-Edged Premium Floor Mats, Carbonite Interior Accents, and Nappa/Alcantara® Seats with Daytona Logo on Ventilated Front Seats, and more!

////// Charger Daytona 392 shown in TorRed.

////// Charger SRT Hellcat® Redeye Widebody shown in Smoke Show.

READY TO DOMINATE

The Charger SRT® models are all charged up and these fearless four-door models are the embodiment of American muscle. In case the engine noise left any doubt, the Hellcat badge can be found around and inside the Charger SRT® Hellcat Widebody. Inside, you'll find performance-inspired materials, the latest technology and two pedals that make every drive exhilarating. These Widebody models add 8.9 cm of width over a standard Charger model and boast a wider track for a more menacing stance and impressive stability.

With wide fenders and a Supercharged 6.2L HEMI® V8 engine, the Dodge Charger SRT® Hellcat Widebody is ready to dominate the track.

The accolades go on and on. The world's most powerful production sedan. The highest top speed of any mass-produced four-door sedan. But to us, nothing sounds better than the roar of its Supercharged High-Output Engine with 797 HP and 707 LB-FT of Torque (527 KW / 881 NM at 4800 RPM).

THE ALL NEW SRT® BLACK PACKAGE

Command the roads and demand attention with the sleek SRT® Black package. Includes Midnight metallic Exterior Badging and is available in Charger SRT® Hellcat and SRT Hellcat Redeye Models. AEC Standard.

////// Charger SRT Hellcat®
Black Appearance Package shown in F8 Green.

SAFETY & SECURITY FEATURES

PARKVIEW® REAR BACK-UP CAMERA⁴ // This system displays the area directly behind your vehicle when the vehicle is in Reverse. Dynamic grid lines adjust with steering input to assist in parking. Standard.

PARKSENSE® REAR PARK ASSIST⁵ // When your vehicle is in Reverse and moving at a low speed, the system can detect objects in your vehicle's path. When sensors detect objects in the back-up pathway, the system provides an audible and visual warning. Standard.

BLIND SPOT MONITORING (BSM)⁶ WITH REAR CROSS-PATH DETECTION⁴ // Dual radar sensors constantly monitor driver blind spots, providing notification of an encroaching vehicle via illuminated icons in the sideview mirrors and by audible chime. The system includes Rear Cross-Path Detection,⁴ which monitors for vehicles and objects in perpendicular relationships to the vehicle while, for example, backing out of parking spots or driveways. AEC Standard.

ADAPTIVE CRUISE CONTROL (ACC)⁷ // Automatically adjusts vehicle speed to maintain desired distance from the vehicle ahead and can bring the vehicle to a full stop without driver intervention. Available with Technology Group.

FULL-SPEED FORWARD COLLISION WARNING WITH ACTIVE BRAKING (FSFCW)⁸ // Radar and camera technology combine to alert you when the system senses potential frontal impact. If you're not able to respond quickly enough, the system will automatically engage the brakes with the ability to bring the vehicle to a complete stop. Available with Technology Group.

LANESENSE® LANE DEPARTURE WARNING (LDW) WITH LANE KEEP ASSIST⁹ // This system measures your position within lane boundaries. If it detects an unintentional lane drift, it will alert you and correct the vehicle back into the lane. Available with Technology Group.

ELECTRONIC STABILITY CONTROL (ESC)² // This system is designed to assist the driver in maintaining control of the vehicle when a loss of traction is detected. ESC² senses when a vehicle loses steering control and attempts to correct the vehicle's course by automatically applying the brakes at individual wheels. Standard.

RAIN-SENSING WINDSHIELD WIPERS // System sensors automatically detect moisture on the windshield and activate the wipers. Available with Technology Group.

READY ALERT BRAKING // The system anticipates situations when you might initiate an emergency brake stop and uses the ESC² pump to pre-charge the brake system in order to decrease the time required for full brake application. Standard.

RAIN BRAKE SUPPORT // When your car's windshield wipers have been activated, the system pulses the brake pads closer to the spinning rotors, helping to keep the rotors and pads dry for greater control and operator security. Standard.

IN TOUCH WHEREVER YOU GO

The Uconnect® system is your customizable, connected vehicle platform dedicated to safe and seamless communication, navigation and entertainment – all from one easy-to-use touchscreen.

Uconnect®

COMPATIBILITY YOUR WAY

Uconnect® brings a wide range of interactive features to your vehicle and beyond through a highly intuitive communication experience.

UCONNECT PHONE¹⁰

Stay connected safely. Pairs a Bluetooth® phone to send and receive hands-free¹⁰ calls. Includes:

- **DO NOT DISTURB** to route incoming calls to voice mail and suppress text messages.¹¹
- **VOICE RECOGNITION** to make hands-free¹⁰ calls, listen and respond to text messages,¹¹ record voice memos, and select media stations and navigation destinations.

DRAG-AND-DROP MENU BAR

We've made it easy to customize your Uconnect dashboard with your favorite features and services. Simply press the Uconnect icon on the main menu bar to view all of the available apps. Tap and hold any one of the icons to drag and drop into a personalized menu bar.

SIRI® EYES FREE¹²

Just say it. Use voice commands with Siri Eyes Free¹² and your connected iPhone® to create and send texts,¹¹ make and receive calls, access directions, and play music.

ONE-STEP NAVIGATION

Take the best route right now. AEC provides EU maps via Uconnect Navigation for audible turn-by-turn directions, and detailed 3D maps help to ensure you arrive on time. Use Voice Command and say the complete address to get directions quickly.

Display your favorite iPhone® apps right on your Uconnect® touchscreen. Access your iTunes® library, call anyone in your contacts list or just ask Siri®¹² to help you out while you drive. Get directions, make calls and send messages, and connect to Apple Music, all without pausing your drive. Standard.

Bring the best of Google with you in your Uconnect system. Talk to Google on Android Auto™¹⁵ and get things done with your voice so you can keep your focus on driving. Easily send messages, get directions, control media and more. Just say, "Hey Google" or long-press the voice control button on your steering wheel. Standard.

AEC SERVICES

///// IMPORT

As an official importer for Dodge, we at AEC are the best source for your Dodge vehicle needs. Our vehicles are ordered directly from the manufacturer, configured to your specifications, and delivered directly to the European Union. We guarantee that our vehicles meet all country-specific specifications according to European law. When you are looking for a Dodge vehicle, AEC and the AEC dealer network is the place to go.

///// HOMOLOGATION

AEC vehicles are prepared to manufacturer quality to meet all standards of the E.U. We can assist our customers with the technical conversion, documentation and certification of their vehicles throughout the entire European Union. Customers can rest assured that our extensive experience and that of our AEC dealers ensure that your vehicle meets the registration requirements of your country.

///// FINANCING

As a European customer, you can rely on an extensive range of financial services via your AEC dealer. Our cooperation partner Santander Consumer Bank provides all financial services you will need. The Santander Consumer Bank is one of the biggest industry service providers for financial services. It has many years of experience in the automotive sector, as well as an excellent reputation.

///// WARRANTY

AEC offers extensive, industry leading warranty coverage for all Dodge vehicles. AEC Premium is an insurance product based on the conditions in the factory warranty that provides full coverage for defects in all mechanical and electronic vehicle components for 24, 36, 48 or 60 months or up to 200.000km mileage. With the AEC Premium Plus Extended Warranty, you have the possibility to extend your AEC Premium Plus Warranty with a further 12, 24 or 36 Months (maximum total validity of 60 Months).

AEC PREMIUM PLUS WARRANTY

TERMS AND CONDITIONS

§ 1 SUBJECT MATTER

1. The seller/guarantor Auto Export Corporation (hereinafter referred to as "AEC"), 24 Commerce Place, St. Catharines, Ontario, Canada, L2S 0B3 gives the buyer/guarantee holder (dealer), under the other conditions set forth in § 4, a guarantee of the functionality of the assemblies specified in § 2 (1) for the term set in the guarantee agreement. The dealer assigns their rights under these guarantee conditions to the vehicle buyer named in the guarantee agreement. The vehicle buyer accepts this assignment. Compensation will be provided according to the guarantee if one of the guaranteed parts loses its functionality within the agreed guarantee term, and not as a result of a fault in non-guaranteed parts, so that a repair becomes necessary. The guarantee applies within the country, to temporary trips such as holiday and business trips, and also throughout Europe. A temporary trip does not include when the vehicle is predominantly abroad for a period of more than six weeks. The guarantee does not justify any claims for revoking the purchase contract or reduction (reduction of the purchase price). If the repair is unsuccessful twice, the buyer/guarantee holder may request that another specialist garage be commissioned to carry out the repair. This guarantee does not exclude any eventual claims of the buyer under the statutory guarantee. Another condition for guarantee claims is compliance with the requirements of § 4.
2. CAR-GARANTIE GMBH (hereinafter referred to as "CG"), Gündlinger Strasse 12, D-79111 Freiburg, is authorized by the seller/guarantor (AEC) to process the entire guarantee with the buyer/guarantee holder on its behalf and for its account. Notices of amendments (such as a change of holder) and claims subject to guarantee shall be reported to CG.

§ 2 SCOPE OF THE GUARANTEE

The guarantee covers all factory-installed mechanical, electrical, electronic, hydraulic and pneumatic parts of the vehicle described in the guarantee agreement, unless they are excluded by the following paragraphs 2 and 3.

Material and labor costs will not be compensated for:

- Additional equipment not available from the factory
- Refilling and refilling as well as retrofitting of air conditioning systems
- Impurities in the fuel system
- Elimination of noise
- Attachments, superstructures and conversions (covered, however, if installed by AEC)
- Corrosion, oxidation and paint damage;
- Clutch and brake linings (however the multi-disc clutch is covered in automatic and Transfer cases), brake disks and drums, shock absorbers, light bulbs, spark plugs
- Button cells and starter batteries
- Wiper Blades and all drive belts (but the toothed / timing belts of the Engine control)

- Parts that are regularly replaced during maintenance / servicing work
- Tires and wheel balancing
- Spark plugs, hoses and required, specified small items will be reimbursed, provided that they have to be replaced in connection with the repair of compensable damage.

§ 3 EXCLUSIONS

No guarantee applies without consideration of contributing causes of damage:

- a) by accident, such as an event directly resulting from a sudden external mechanical force;
- b) through improper, mischievous or malicious actions, misappropriation, in particular theft, unauthorized use, robbery and embezzlement, damage that is directly caused by animals, storm, hail, frost, corrosion, lightning strike, earthquake or water ingress, as well as by scorching, fire or explosion;
- c) by war events of any kind, civil war, civil unrest, strike, lockout, terrorism, vandalism, seizure or other sovereign interventions, or by nuclear energy
- d) arising from participation in driving events with racing character or from associated practice rides;
- e) by altering the original design of the motor vehicle (such as tuning, VMAX suspension, gas conversion, etc.) or by installing third-party or accessory parts that are not approved by the manufacturer;
- f) by the use of a part that is recognizably in need of repair, unless the damage can be shown to be unrelated to the need for repair, or when at the time of the damage the part had been at least provisionally repaired by a trained professional;
- g) when the buyer/guarantee holder has at least temporarily used the motor vehicle for commercial passenger transport or if the motor vehicle has been leased commercially to a changing group of persons;
- h) caused by the use of unsuitable operating materials or by a lack of operational materials (lubricants, oils, cooling water, etc.);
- i) for which a third party is required to intervene, which is rectified as an expression of the manufacturer's goodwill, or which are caused by a manufacturing or material defect that occurs in large numbers of the vehicle type (serial defect) and for which in principle manufacturer's scope comes into consideration according to type and frequency.

§ 4 CONDITION FOR GUARANTEE CLAIMS

The condition for any guarantee claims is that the buyer/guarantee holder,

1. BEFORE THE CLAIM EVENT:

- a) has carried out and documented the maintenance, inspection and care on the vehicle that is prescribed or recommended by the manufacturer at the dealer or at an authorized workshop recognised by the manufacturer, or carried out and documented in accordance with the manufacturer's specifications. Exceeding the manufacturer's kilometre specification of up to 3,000 km or the manufacturer's timeframe of up to three months is harmless, whereas the exceeding of one of the

specified specifications already precludes a guarantee claim. A guarantee claim is only contrary to one of the aforementioned requirements if it is responsible for the occurrence of the damage. Concurrent causality is sufficient. Concurrent causality is suspected. The buyer/guarantee holder is at liberty to prove the lack of causation.

fails to indicate interventions or other influences on the odometer, immediately indicates a defect or the need for immediate replacement of the odometer indicating the mileage.

follows the vehicle operating instructions of the manufacturer.

2. after the claim event:

- a) immediately notifies the seller/guarantor (AEC) or the CG at their relevant registered offices the relevant damage under guarantee after the occurrence of the same but before the repair, by phone or by email;
- b) has the repair done by the dealer. After consultation with CG, the repair can also be carried out at another qualified vehicle garage;
- c) demonstrates CG any maintenance or care performed since the beginning of the guarantee with invoices from the dealer or the executing workshop by submitting copies of the documents;
- d) allows an authorized agent of the seller/guarantor (AEC) and/or of CG to carry out an inspection of the damaged parts at any time and, upon request, provides the information necessary to establish the damage;
- e) reduces the damage as much as possible while following the instructions of CG; if circumstances permit, he shall obtain such instructions before the repair begins.

§ 5 REIMBURSEMENT OF COSTS

1. Guarantee-related labor costs will be fully reimbursed to the buyer/guarantee holder according to the manufacturer's standard working hours. Guarantee-related material costs are paid at most according to the non-binding price recommendations of the manufacturer.
2. If the repair costs exceed the value of an exchange unit that is customarily installed in the case of such damage, the obligation to pay compensation shall be limited to the cost of this replacement unit, including removal and installation costs, applying paragraph 1.
3. The maximum amount of compensation subject to guarantee is limited to the time value of the damaged vehicle at the time the guarantee claim occurs per claim.

4. No compensation is paid for:

- a) the costs for testing, measuring and adjustments (according to the manufacturer's working time standard), insofar as they are not incurred in connection with damage requiring compensation and maintenance, inspection, cleaning or care work prescribed or recommended by the manufacturer;
- b) the replacement of direct or indirect consequential damages, such as shipping and disposal costs, parking fees and compensation for lost use; paragraph 5 shall remain unaffected hereby.

Expenditures for mobility

If agreed separately in the guarantee agreement, the expenditures for achieving mobility (i.e. towing, rail travel, rental car, accommodation and telephone costs) will be reimbursed.

§ 6 CLAIMS SETTLEMENT

1. CG assumes responsibility on behalf of the seller/guarantor (AEC) for processing all claims with the buyer/guarantee holder. A repair invoice must be submitted to CG containing a clear and detailed description of the work performed, the spare parts prices and the labor costs with standard working hours.
2. In every case, the guarantee shall be notified to CG by phone prior to the repair so that CG can authorize the repair. A telephone service is available for this:
Monday to Friday from 8:00 am to 5:00 pm at
+49 761 4548-966. warranty-en@aecurope.com

§ 7 ASSIGNMENT OF CLAIMS AND STATUTE OF LIMITATIONS

1. In the event the vehicle with the guarantee is sold, the guarantee claims pass to the new holder with the ownership of the vehicle. Any change in ownership must be reported to AEC or CG in writing no later than 14 days after the change in the holder.
2. Claims under the guarantee lapse six months after the claim event, at the latest six months after the end of the guarantee term.
